Initial Build Notes

Creative Director: Grace Ok

Designer: Jen Kim

 For the decorative font I like the approach of a brustroke style font. However, I do wish to see more weight in the strokes. Here are some example fonts I pulled from Adobe fonts for reference.

- The body text on home page would look better center aligned
- You should add more pictures in each subpage. Some can be pulled from the gallery!
- For the types of calligraphy it would be great with visual reference to each one
- For the tools i'd also like to see visuals with what each tool is made of. The picture should be side by side with each perspective tool.
- I think the footer with our names could also be centered.
- Let me know if you're having difficulty finding the artist / date but I do think those information (if available) are under each picture
